Creative ideas developed into winning concepts

We create digital and traditional media for use in marketing communication and training to assist our clients in reaching their goals. We translate complex messages into compelling communication improving engagement, understanding and retention. Our experience of working across different industry sectors has given us the ability to apply best practice wherever possible.

Established in 2002, we have grown through personal recommendation. This has led us to some unlikely projects, from children's 3D colouring games to 3D experiential armoured vehicle training. The underlying technologies are remarkably similar. This ability to develop work for unrelated market sectors, always with a strong design sense, has given us a fresh outlook.

Our flexibility is reflected in the work we produce and through an understanding of your needs and careful planning we employ the best techniques to meet and exceed our clients goals.

The quality of our work and how effortless it is to work with us may account for many of our clients continuing to use our services when they have moved organisations.

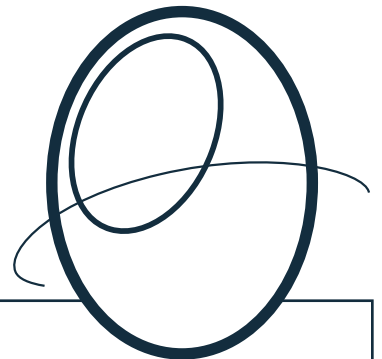

We are an accredited Service Provider on NEESPR (North East England Service Provider Register) so you may be eligible for part funding for your project through Business Link (0845 600 9 006). Listing on the register is not automatic, to qualify businesses must meet a variety of criteria and quality checks including positive customer feedback.

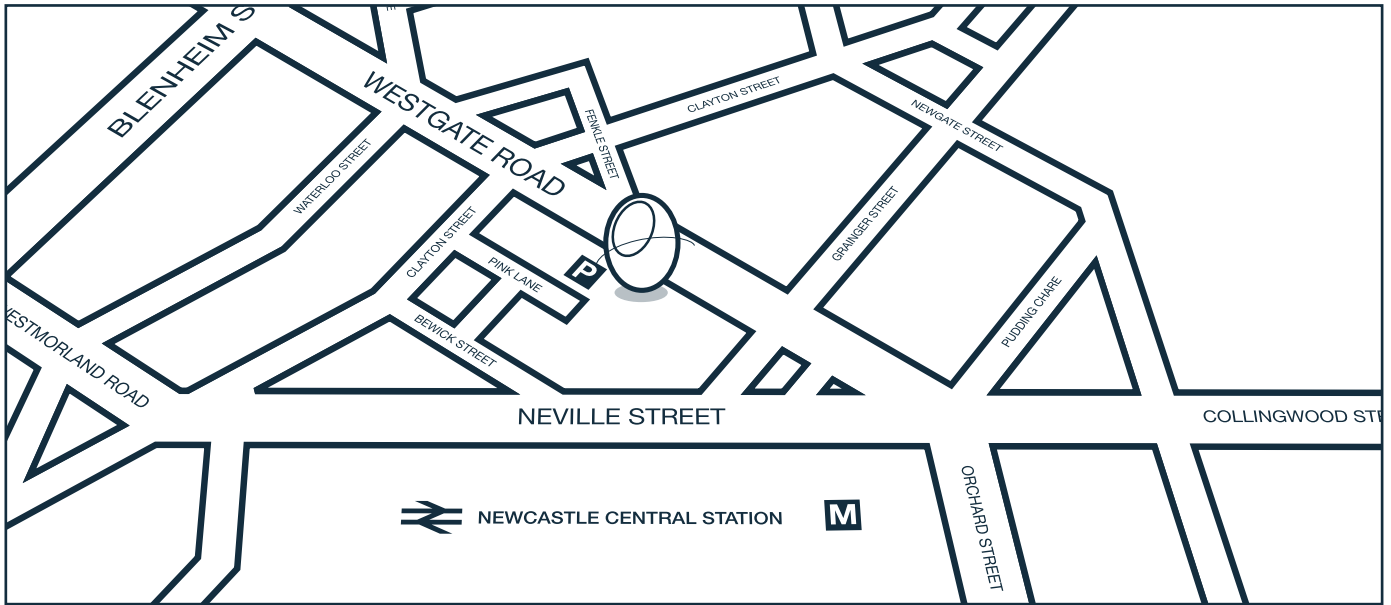

// Services

- Computer Based Training/E-learning
- Architectural Visualisation
- Promotional and Support Material
- Presentations for Seminars/Conferences
- Induction/visitor presentations
- Motion Graphics
- Online Applications
